SIGMA its a measure of "comparative quality" using defects per million

Platinum Execution

Our Lean Six Sigma Program is led by our team of expert practitioners. Qualified as Master Black Belts, with years of professional experience. We offer a range of solutions to help your individual and business journey in delivering transformational results.

What is Lean Six Sigma?

Lean Six Sigma is a two staged business approach to continual improvement which focuses on reducing waste and product variation from manufacturing, service or design processes. Lean refers to maximising customer value and minimising waste; creating more value for customers with less wasted resources. Six Sigma is the on-going effort to continually reduce process and product variation through a defined project approach.

Combined, the two approaches drive continual improvement, building a philosophy that is the foundation of all effective management systems and any business that wants to grow and progress for the future.

Why we do it?

“BECAUSE WE ARE PASSIONATE ABOUT MAKING A DIFFERENCE”

Our platinum offer

An intensive program, its not training, coaching or delivery but a unique combination of each for outstanding value to our customers. It's a program to equip participants and their business to deal with high return, high risk, complex organisational issues using sophisticated analysis, solution development and change management.

We work closely with your teams, bringing our consultants' expertise and experience to bear on your issues. Our commitment is to pass on skills so that high levels of internal capability are developed techniques.

“WITHOUT CHANGE THERE IS NO INNOVATION, CREATIVITY, OR INCENTIVE FOR IMPROVEMENT. THOSE WHO INITIATE CHANGE WILL HAVE A BETTER OPPORTUNITY TO MANAGE THE CHANGE THAT IS INEVITABLE.”
